

Restore Your Smile With Dental Implants

At Perry Family Dentistry, we believe everyone deserves to smile with confidence. Our advanced dental implant solutions are designed to look, feel, and function like natural teeth—restoring not just your smile, but your quality of life. Whether you're missing one tooth or many, we'll help you find the right solution to eat, speak, and smile with ease again.

Why Choose Dental Implants?

Dental implants do more than restore your smile—they protect your long-term oral health. Unlike traditional dentures or bridges, implants are anchored directly into the jawbone, providing exceptional stability and preventing bone loss. With proper care, they can last for decades.

Benefits Of Dental Implants

- Look, feel, and function like natural teeth
- Improve chewing and speaking ability
- Help preserve facial structure
- Prevent jawbone deterioration
- Keep adjacent teeth in proper alignment
- Reduce the risk of gum disease

Types Of Dental Implants We Offer:

All-On-X Implants

An advanced full-arch restoration using four or more strategically placed implants. Ideal for patients seeking a stable, permanent alternative to traditional dentures.

All-On-4® Implants

A specific All-On-X technique using just four implants per arch. This option often allows for faster healing and immediate function—especially helpful for those with reduced bone density.

Single Dental Implants

Perfect for replacing one missing tooth, this option offers a natural look and feel without affecting neighboring teeth.

Implant-Supported Dentures

An advanced full-arch restoration using four or more strategically placed implants. Ideal for patients seeking a stable, permanent alternative to traditional dentures.

Implant Bridges

Used to replace multiple missing teeth in a row. Unlike traditional bridges, they don't rely on surrounding teeth for support.

Expert Care With Dr. Blake J. Perry

When it comes to dental implants, experience matters. Dr. Blake J. Perry brings over 20 years of clinical expertise to every procedure. Known for his precision and compassionate approach, he's helped countless patients restore their smiles with confidence.

Dr. Perry has completed advanced training at The Kois Center and CEREC Doctors Education—two of the most respected programs in dentistry. This commitment to continuing education means you receive the highest level of care with today's most effective techniques.

He blends aesthetic detail with long-term function, crafting results that look natural and feel comfortable. Patients consistently praise his thorough explanations, gentle manner, and excellent outcomes.

Meet the provider patients trust with their most important dental decisions.

All Your Care, All In One Place

At Perry Family Dentistry, your entire implant process happens under one roof—from the first consultation to your final restoration. No outside referrals. No delays. Just coordinated, comfortable care every step of the way.

Our In-House Services Include:

- 3D imaging and digital scans
- Implant placement surgery
- Custom crown and bridge design
- Post-operative follow-up and care

By keeping everything in one location, we ensure consistent quality, better communication, and a smoother experience. You'll work with the same trusted team throughout your journey, receiving personalized and convenient care.

We also offer sedation options and a calming office atmosphere to help you feel at ease.

Real Patients. Real Results.

Dental implants don't just restore teeth—they restore confidence, comfort, and joy. Our patients often arrive feeling self-conscious or frustrated with traditional dentures, but after treatment, they leave with life-changing results. From eating favorite foods again to smiling in photos without hesitation, the benefits are personal and profound. We're proud to be part of each transformation.

Here's What Real Patients Have Shared:

"For the first time in my life, I have pretty teeth! Dr. Perry and his staff are incredibly caring and compassionate. I have never been better cared for by a dental team. I came with dental challenges, and Dr. Perry created a care plan that worked with my budget and delivered amazing results. I couldn't be happier!"

- Tana Reneau – Full Implants

"I haven't had a bad experience at Perry Family Dental! I've had cleanings, fillings, a crown, extraction, and an implant. Every visit has been great. My hygienist, Montana, clearly explains options and helps me prioritize treatments. They take the stress out of dental visits."

- Cheri Gleichmann – Comprehensive Care
